

Application security assessment

Prioritized findings & remediation

SAMPLE / PT-001

Purpose

A discussion example showing how findings, ownership and next steps are presented.

This fictional example does not describe a client engagement or actual test results.

Finding	Priority	Next action
Object authorization	High	Enforce ownership checks
Session expiry	Medium	Invalidate expired sessions
Security headers	Low	Apply response policy

Included in the example

- Business impact and supporting evidence
- Clear fix ownership and retest criteria

Example scope: a fictional web application

Engagement scope and deliverables are agreed before work begins.
